OUT THERE STARTS HERE™

Aquila Catamarans was founded on a belief that better was possible—and that the best way to get **Out There** was to think out there. With decades of boatbuilding experience and a global collaboration of award-winning designers and engineers, Aquila has become the world leader in performance-driven, innovation-packed catamarans.

But “Out There” isn’t just where our boats take you. It’s how we think, how we build, and how we push boundaries – challenging conventions in everything from hull design to onboard experience. Every model is born from out-there ideas, cutting-edge technologies, and a relentless pursuit of what’s next.

Today, hundreds of new Aquilas cruise waters across the globe every year, each one crafted with the reliability, durability, and confidence that only comes from a forward-thinking legacy.

Because **Out There Starts Here** – in our designs, our mindset, and in every journey that begins aboard an Aquila.

NASSAU, BAHAMAS

KELINGKING BEACH, INDONESIA

INSPIRED BY THE ISLANDS. DESIGNED AND BUILT BY THE WORLD.

Catamarans are believed to have originated in **Indonesia** circa 3000 to 1500 BCE. The shallow draft mitigated the risk of running aground, and its twin hulls provided essential stability in treacherous waters. Long-time boaters and colleagues **Lex Raas, John Xiong** and **Bill McGill** recognized the potential of this ancient engineering and worked together to create **Aquila Power Catamarans**.

Born in **Johannesburg, South Africa**, Raas sailed anything and everything he could, entering his first regatta at age four. Xiong's **Sino Eagle** shipyard is a globally recognized

producer of kayaks, rowing shells and surfboards, some of which have been used in the Olympic Games. Together with the impressive distribution reach of **MarineMax** led by McGill, Aquila was launched.

Aquila's **Clearwater, Florida** headquarters—led by Jean Raas—drives design, product development, marketing, purchasing and post-sales service. Aquila has also worked with world-renowned yacht design firms such as J&J Design in **Ljubljana, Slovenia**, Peart Yacht Design in **Cape Town, South Africa** and VPLP in **Paris, France** to bring best-in-class

design sensibilities, innovation, and sustainability considerations to the portfolio.

Our state-of-the-art facility in **Hangzhou City, China** brings together leading components from global suppliers such as Volvo Penta, Raymarine, Kohler, and hundreds of others. Sophisticated tooling and ventilation systems, extensive process and quality controls, substantial use of solar power, and a workforce of more than 500 employees combine to make Aquila the world leader in power catamarans.

L-to-R: Frank Xiong, Bill McGill, John Xiong and Lex Raas

Power catamarans offer several distinct benefits over monohulls.

GREATER STABILITY & COMFORT

The dual-hull design of catamarans minimizes rolling and pitching motions, resulting in a smoother, safer ride, especially in rough seas.

MORE SPACE

Single hull boats usually taper to a point, which means space gets narrower as you move towards the bow. On a catamaran, this space constriction does not happen. The wider beam allows for multiple cabins, spacious lounging areas, and ample storage.

BETTER MANEUVERABILITY

Twin-hull configuration and shallow draft makes power cats easier to handle in tight situations, such as docking, navigating channels and inlets, or getting close to idyllic shallow-water locations.

FUEL EFFICIENCY

Catamarans experience less water resistance and improved hydrodynamics, reducing fuel consumption. The twin hulls allow the boat to glide more easily through the water.

We obsess over the details.
So you don't have to.

SAFETY FIRST

All Aquila models are CE Certified by the International Marine Certification Institute, the only international certification for recreational boats.

GREATER STRENGTH

Aquila power cats are made using a resin-infusion process for superior strength and consistency. It eliminates most air voids which can compromise the hull's integrity.

QUALITY MATERIALS

We only use vinylester resin for our hulls. It's resistant to heat, chemicals, water, corrosion, and has a high impact strength. Most boats are built with low-quality polyester which can crack and blister easily.

MORE THAN MEETS THE EYE

For us, it's all about the details: expansive laminated glass for panoramic views, bulbous bows on all Yacht models for a smoother ride, meticulously designed hulls, easy bow-to-flybridge access, a patented davit crane for the water toys, ample storage for all the comforts of home, and more!

MEET THE FAMILY

FISHING

Some chase fish. Others chase freedom. The Aquila Molokai series delivers both—offshore-ready, stable, and versatile. Built for bold journeys.

NORMAN'S CAY, BAHAMAS

The background of the entire page is a photograph of a bright blue ocean with white-capped waves under a clear blue sky with scattered white clouds. In the upper left, there is a dark rounded rectangle containing the numbers '4 6'. To the right of this is the title 'COUPE POWER CATAMARAN'. Below the title is a paragraph of text describing the 'Aquila 46 Coupe power catamaran'.

4 6

COUPE POWER CATAMARAN

The **Aquila 46 Coupe power catamaran** offers the best of both worlds—sophisticated style with powerful performance. Its versatile design transitions effortlessly from open-air paradise to sheltered retreat, while the generous 17'11" beam creates remarkable space for entertaining and cruising. With double stepped hulls and the innovative carbon fiber Aquila Hydro Glide Foil System®, this premium power catamaran delivers exhilarating performance without sacrificing comfort—transforming weekend excursions into unforgettable adventures.

QUIET SOPHISTICATION ROARING PERFORMANCE

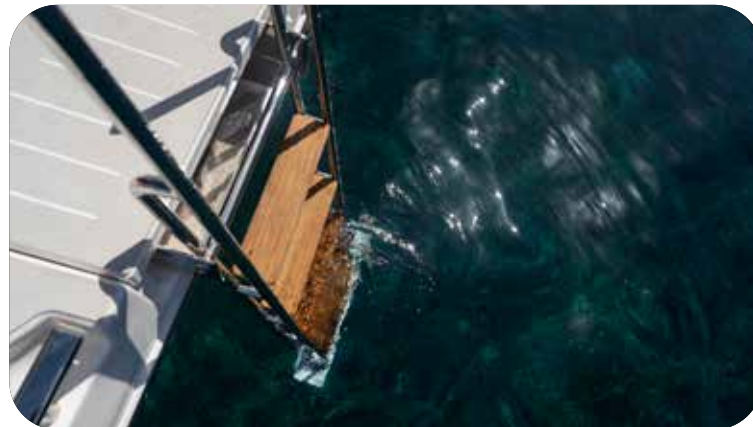

The standard Aquila Hydro Glide System™ boost fuel efficiency by up to 30% and makes for a smoother ride.

The combination of cutting-edge technology, powerful engines, and sleek design ensures that every moment on the water feels like pure freedom.

READY FOR ANYTHING

Offering the highest level of fit and finish, the Coupe range is designed for both inshore and offshore conditions. Its sleek profile, reminiscent of a luxury sports car, combined with a robust stance, ensures it stands out on the water. The expansive beam enhances deck space for entertainment and cruising, seamlessly blending outdoor and indoor elements.

Roll out the swim ladder for easy water access

Large hullside windows for amazing views

Helm station with sunroof open

Helm Station

Aft platform perfect for water activities

Spacious cabins

Dining area with high/low table

Bow lounging area with easy salon access

The background of the entire page is a photograph of a blue ocean with white-capped waves in the foreground. The sky is a clear, bright blue with a few wispy white clouds near the horizon. In the upper left, there is a white rounded rectangle containing the number '42'.

42

COUPE POWER CATAMARAN

Who says you have to choose? The **Aquila 42 Coupe power catamaran** brings together the thrill of open-air living with the comfort of a luxury yacht. Its generous beam creates remarkable space for entertaining, while the single-level layout, two private cabins with en-suite bathrooms, and double stepped hulls deliver both premium comfort and exhilarating performance. With the innovative carbon fiber Aquila Hydro Glide Foil System[®], this versatile boat lets you travel farther, faster, and in total comfort.

INSTANT IMPACT UNLIKE ANY OTHER

The standard Aquila Hydro Glide System™ boost fuel efficiency by up to 30% and makes for a smoother ride.

The moment you step on board, they'll immediately notice and appreciate the wide beam, which enhances the usability of the deck space for both entertainment and cruising.

ALL THE COMFORTS OF HOME

The new Coupe range from Aquila power catamarans marks the dawn of a new era. Drawing from extensive experience and feedback across the Aquila line, we've crafted a masterpiece that excels in styling, quality, performance, and usability.
