OUT THERE STARTS HERE™

Aquila Catamarans was founded on a belief that better was possible—and that the best way to get **Out There** was to think out there. With decades of boatbuilding experience and a global collaboration of award-winning designers and engineers, Aquila has become the world leader in performance-driven, innovation-packed catamarans.

But “Out There” isn’t just where our boats take you. It’s how we think, how we build, and how we push boundaries – challenging conventions in everything from hull design to onboard experience. Every model is born from out-there ideas, cutting-edge technologies, and a relentless pursuit of what’s next.

Today, hundreds of new Aquilas cruise waters across the globe every year, each one crafted with the reliability, durability, and confidence that only comes from a forward-thinking legacy.

Because **Out There Starts Here** – in our designs, our mindset, and in every journey that begins aboard an Aquila.

130 MILES OFF CLEARWATER BEACH, FLORIDA

KELINGKING BEACH, INDONESIA

INSPIRED BY THE ISLANDS. DESIGNED AND BUILT BY THE WORLD.

Catamarans are believed to have originated in **Indonesia** circa 3000 to 1500 BCE. The shallow draft mitigated the risk of running aground, and its twin hulls provided essential stability in treacherous waters. Long-time boaters and colleagues **Lex Raas, John Xiong** and **Bill McGill** recognized the potential of this ancient engineering and worked together to create **Aquila Power Catamarans**.

Born in **Johannesburg, South Africa**, Raas sailed anything and everything he could, entering his first regatta at age four. Xiong's **Sino Eagle** shipyard is a globally recognized

producer of kayaks, rowing shells and surfboards, some of which have been used in the Olympic Games. Together with the impressive distribution reach of **MarineMax** led by McGill, Aquila was launched.

Aquila's **Clearwater, Florida** headquarters—led by Jean Raas—drives design, product development, marketing, purchasing and post-sales service. Aquila has also worked with world-renowned yacht design firms such as J&J Design in **Ljubljana, Slovenia**, Peart Yacht Design in **Cape Town, South Africa** and VPLP in **Paris, France** to bring best-in-class

design sensibilities, innovation, and sustainability considerations to the portfolio.

Our state-of-the-art facility in **Hangzhou City, China** brings together leading components from global suppliers such as Volvo Penta, Raymarine, Kohler, and hundreds of others. Sophisticated tooling and ventilation systems, extensive process and quality controls, substantial use of solar power, and a workforce of more than 500 employees combine to make Aquila the world leader in power catamarans.

L-to-R: Frank Xiong, Bill McGill, John Xiong and Lex Raas

Power catamarans offer several distinct benefits over monohulls.

GREATER STABILITY & COMFORT

The dual-hull design of catamarans minimizes rolling and pitching motions, resulting in a smoother, safer ride, especially in rough seas.

MORE SPACE

Single hull boats usually taper to a point, which means space gets narrower as you move towards the bow. On a catamaran, this space constriction does not happen. The wider beam allows for multiple cabins, spacious lounging areas, and ample storage.

BETTER MANEUVERABILITY

Twin-hull configuration and shallow draft makes power cats easier to handle in tight situations, such as docking, navigating channels and inlets, or getting close to idyllic shallow-water locations.

FUEL EFFICIENCY

Catamarans experience less water resistance and improved hydrodynamics, reducing fuel consumption. The twin hulls allow the boat to glide more easily through the water.

We obsess over the details.
So you don't have to.

SAFETY FIRST

All Aquila models are CE Certified by the International Marine Certification Institute, the only international certification for recreational boats.

GREATER STRENGTH

Aquila power cats are made using a resin-infusion process for superior strength and consistency. It eliminates most air voids which can compromise the hull's integrity.

QUALITY MATERIALS

We only use vinylester resin for our hulls. It's resistant to heat, chemicals, water, corrosion, and has a high impact strength. Most boats are built with low-quality polyester which can crack and blister easily.

MORE THAN MEETS THE EYE

For us, it's all about the details: expansive laminated glass for panoramic views, bulbous bows on all Yacht models for a smoother ride, meticulously designed hulls, easy bow-to-flybridge access, a patented davit crane for the water toys, ample storage for all the comforts of home, and more!

GET HOOKED.

Some chase fish. Others chase freedom. With the **Aquila Molokai Series**, you don't have to choose.

28 MOLOKAI

28 MOLOKAI CUDDY

36 MOLOKAI

47 MOLOKAI

Inspired by the rugged beauty and untamed spirit of the Hawaiian coast, these offshore-ready catamarans are built for anglers who want it all—hardcore fishability, next-level stability, and the comfort to keep going long after others head home.

The Molokai's wide stance and purpose-built design deliver a steady ride in challenging conditions, with space to move, cast, and land the big one. But this isn't just a

fishing machine. It's a weekend-ready water platform that can pivot from chasing tuna to chasing sunsets.

Take it offshore, run it overnight, or just drop anchor and break out the toys. Whether you're navigating open ocean or a hidden inlet, the Molokai Series is made to handle the wild—and bring you back in style.

Because out there, adventure calls.

130 MILES OFF CLEARWATER BEACH, FLORIDA

The background of the entire page is a photograph of a blue ocean with white-capped waves. In the upper left, there is a white rounded rectangle containing the number '47'. To the right of this, the title 'MOLOKAI POWER CATAMARAN' is written in white capital letters. Below the title, a paragraph of white text describes the boat's features.

47

MOLOKAI POWER CATAMARAN

The **Aquila 47 Molokai power catamaran** stands as the ultimate offshore fishing platform with unmatched luxury. Its center console design with double-stepped hulls delivers exceptional handling in challenging seas, while twin 600HP or quad 400HP Mercury Verado outboards provide commanding power. Beyond serious fishing capability, it offers something unprecedented in this category—a luxurious stateroom with queen bed, stand-up head with shower, and air-conditioned helm seating that transform overnight fishing trips into sophisticated adventures.

KING OF THE FISHERMEN

Powered by twin 600 hp or quad 425 hp Mercury Verado outboards, the Aquila 47 Molokai delivers thrilling performance and a smooth, predictable ride, thanks to her aggressive twin-step hull design and strong, lightweight vacuum-infused construction.

Pressurized livewells fed by a Hooker sea chest keep your bait lively, while cavernous fish boxes accommodate the largest fish and longest trips. Electric reel outlets provide power for deep-dropping, and the carbon fiber hardtop is factory reinforced for outriggers and custom towers.

NO HORIZON OUT OF REACH

Joystick piloting makes close-quarters maneuvering a breeze, while a 1,048-gallon (3,967 Liter) fuel capacity brings any horizon within reach. Underway, seven protected helm seats in two air-conditioned rows keep your crew safe and comfortable, while state-of-the-art Raymarine electronics, C-Zone digital switching and a custom-tuned Fusion audio system put information and entertainment at your fingertips.

Designated tackle storage box areas

Aft-facing MFD

Large capacity insulated fish and coffin boxes

Comfortable sunpads with cup holders

Seating for up to 17

Plenty of rod storage

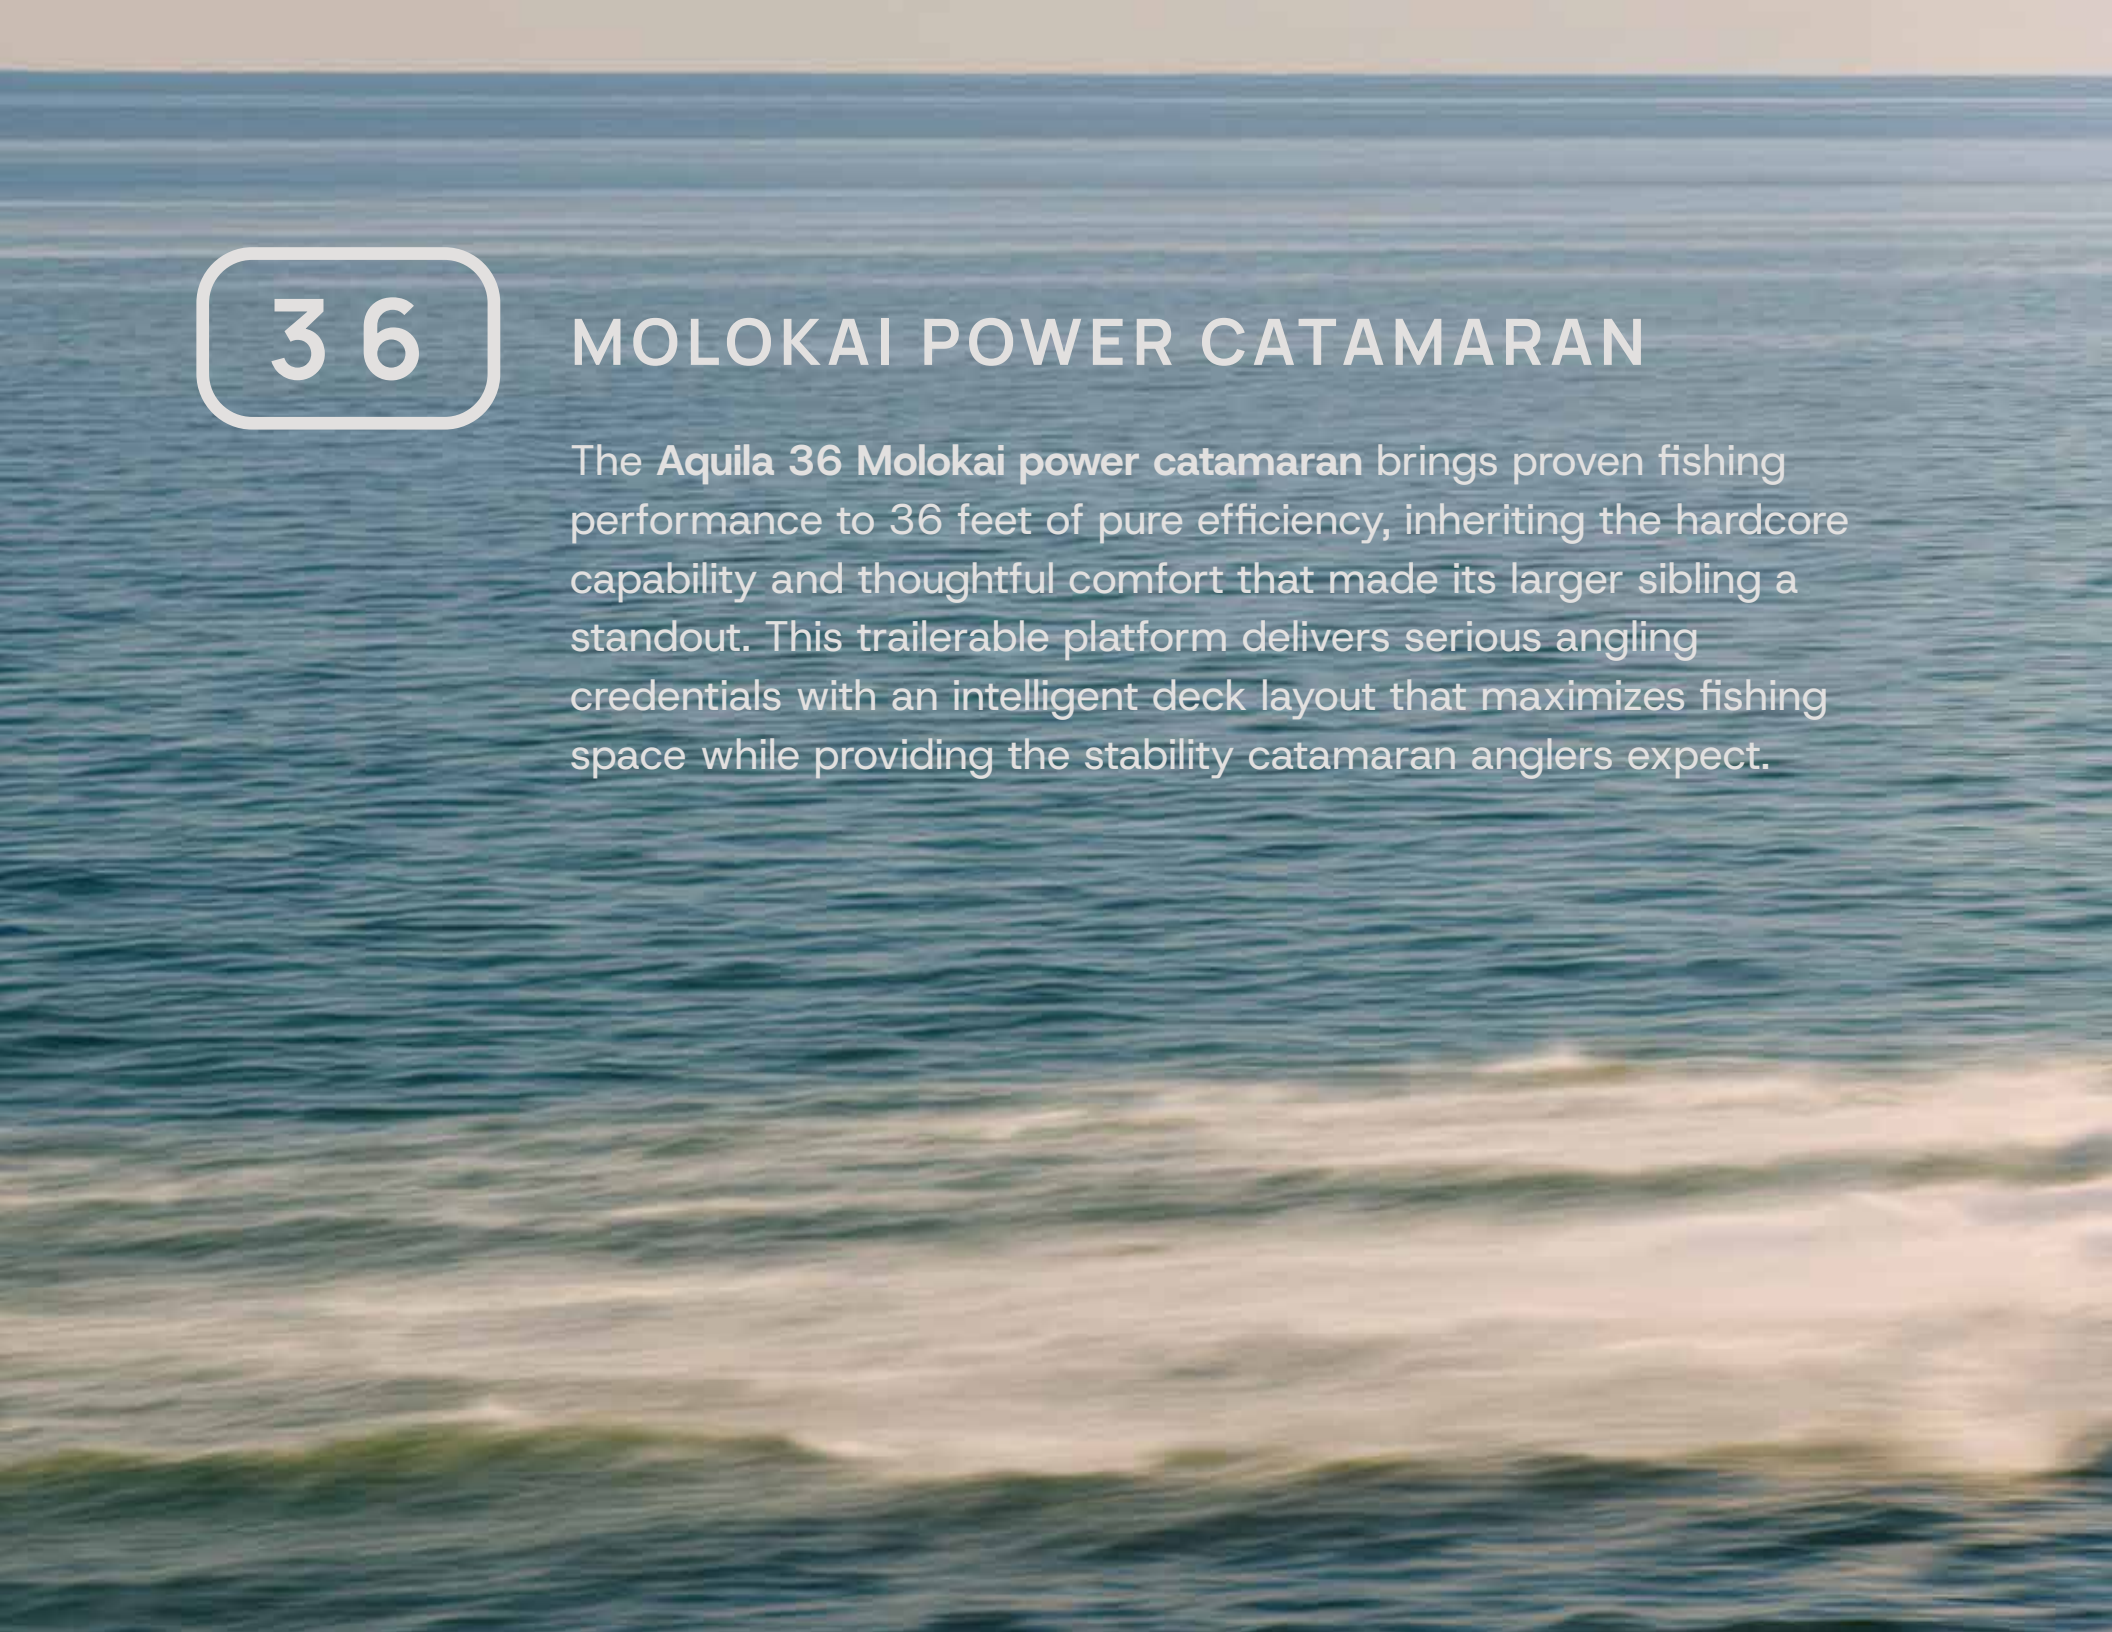

Spacious stateroom with queen-size berth and stand-up wet head

Concealed cutting board

47

36

MOLOKAI POWER CATAMARAN

The **Aquila 36 Molokai power catamaran** brings proven fishing performance to 36 feet of pure efficiency, inheriting the hardcore capability and thoughtful comfort that made its larger sibling a standout. This trailerable platform delivers serious angling credentials with an intelligent deck layout that maximizes fishing space while providing the stability catamaran anglers expect.

PUNCHES ABOVE ITS WEIGHT

Powered by twin Mercury V10 outboards (up to 425 HP with joystick piloting), the Aquila 36 Molokai delivers serious offshore capability in a trailerable package. A double-stepped hull and vacuum-infused construction with carbon fiber reinforcement produce a smooth, efficient ride, while high tunnel clearance creates an air-cushion effect that quiets the hull when trolling.

Pressurized transom livewells fed by a dedicated sea chest keep bait lively, and a 198-gallon fishbox handles whatever the day brings. The carbon fiber hardtop is factory reinforced for outriggers and custom towers, and 19 rod holders across the gunnels, transom, and hardtop give every angler a place to fight from.

Racing

Racing

50

NO WATER OFF LIMITS

A 508-gallon fuel capacity puts distant grounds within reach, while single-level 360-degree walk-around fishability and a starboard dive/fish door turn the entire deck into a working platform. Three protected helm seats with individual armrests sit behind a wraparound windshield, with optional electric wipers to keep the view clear when conditions turn.

Designated tackle storage box areas

Starboard dive/fish door

Superior visibility from the helm

Comfortable sunpads with cup holders

Fish & tackle station

Plenty of rod storage

Spacious cabin with memory-foam mattress

The background of the entire page is a photograph of a boat's wake on a deep blue ocean. The wake is a large, white, frothy spray of water that stretches across the middle of the image. The sky above is a clear, light blue with a few wispy clouds. The overall scene is bright and sunny, suggesting a clear day at sea.

28

MOLOKAI POWER CATAMARAN

The Aquila 28 Molokai power catamaran delivers an incredible ride inspired by native Hawaiian watercraft. Born from island hopping in tumultuous Pacific waters, its wide stance provides exceptional stability in challenging conditions. The center console layout enables 360-degree fishability. With twin Mercury outboards, a 30-gallon livewell, and 188 gallons of fishbox capacity, this versatile boat excels at offshore fishing yet transforms easily for family adventures, waterborne activities, and relaxing days with friends.

SMALL BUT MIGHTY

Because the hulls are spaced wide apart, the broad stance makes it easy to walk around both sides of the center console. The position of the center console provides a 360-degree line of sight with controls strategically positioned for ease of operation.

Rod holders, livewells and other fishing necessities are available in abundance.

A VERSATILE BOAT FOR ALL ACTIVITIES

When not being used for offshore fishing or diving, friends and family can enjoy other waterborne activities, including tow sports, or just relax onboard while visiting a favorite dockside restaurant, sand bar, or island. Lounge on the bow seating area or pull up the bow table and enjoy your favorite beverage at sunset with up to 10+ guests onboard.

Relax on the bow with friends

Fishing rod storage

Spacious aft cockpit and transom access

Helm Station

Helm Seating

Angled helm footrest

Fishing rod storage

Console opens for storage and optional head

Fresh water shower/wash down

28

28

MOLOKAI CUDDY POWER CATAMARAN

The **Aquila 28 Molokai Cuddy power catamaran** extends fishing horizons by combining offshore capability with protected accommodations. Its forward cuddy design provides shelter while maintaining the exceptional stability of the open version. With identical fishing features—including the 30-gallon livewell and 188-gallon fish boxes—this intelligent design allows serious anglers to push beyond limits, staying out longer and reaching productive grounds others simply can't access.

TAKE ON THE OPEN SEA

If you're serious about the open sea, this offshore line model with the Hawaiian spirit in its DNA, can be configured to your professional or personal desires. Choose from the available extended hardtop with optional roof racks, center seating, and fish box.

Whether island hopping in the heavy water of the Hawaiian Islands or defying the cold turbulent waters of the North Atlantic and Pacific Northwest, the Aquila 28 Molokai Cuddy handles with poise and confidence.

THE BEST OF BOTH WORLDS

This 28 Molokai Cuddy features an enclosed cabin, offering protection from the elements for comfortable indoor use during long outings. Designed for versatility, it also includes an open deck area for outdoor fishing, making it ideal for all-weather adventures.

Protected interior helm

Tackle storage locker

Stainless steel anchor
