OUT THERE STARTS HERE™

Aquila Catamarans was founded on a belief that better was possible—and that the best way to get **Out There** was to think out there. With decades of boatbuilding experience and a global collaboration of award-winning designers and engineers, Aquila has become the world leader in performance-driven, innovation-packed catamarans.

But “Out There” isn’t just where our boats take you. It’s how we think, how we build, and how we push boundaries – challenging conventions in everything from hull design to onboard experience. Every model is born from out-there ideas, cutting-edge technologies, and a relentless pursuit of what’s next.

Today, hundreds of new Aquilas cruise waters across the globe every year, each one crafted with the reliability, durability, and confidence that only comes from a forward-thinking legacy.

Because **Out There Starts Here** – in our designs, our mindset, and in every journey that begins aboard an Aquila.

FORT DESOTO, FLORIDA

KELINGKING BEACH, INDONESIA

INSPIRED BY THE ISLANDS. DESIGNED AND BUILT BY THE WORLD.

Catamarans are believed to have originated in **Indonesia** circa 3000 to 1500 BCE. The shallow draft mitigated the risk of running aground, and its twin hulls provided essential stability in treacherous waters. Long-time boaters and colleagues **Lex Raas, John Xiong** and **Bill McGill** recognized the potential of this ancient engineering and worked together to create **Aquila Power Catamarans**.

Born in **Johannesburg, South Africa**, Raas sailed anything and everything he could, entering his first regatta at age four. Xiong's **Sino Eagle** shipyard is a globally recognized

producer of kayaks, rowing shells and surfboards, some of which have been used in the Olympic Games. Together with the impressive distribution reach of **MarineMax** led by McGill, Aquila was launched.

Aquila's **Clearwater, Florida** headquarters—led by Jean Raas—drives design, product development, marketing, purchasing and post-sales service. Aquila has also worked with world-renowned yacht design firms such as J&J Design in **Ljubljana, Slovenia**, Peart Yacht Design in **Cape Town, South Africa** and VPLP in **Paris, France** to bring best-in-class

design sensibilities, innovation, and sustainability considerations to the portfolio.

Our state-of-the-art facility in **Hangzhou City, China** brings together leading components from global suppliers such as Volvo Penta, Raymarine, Kohler, and hundreds of others. Sophisticated tooling and ventilation systems, extensive process and quality controls, substantial use of solar power, and a workforce of more than 500 employees combine to make Aquila the world leader in power catamarans.

L-to-R: Frank Xiong, Bill McGill, John Xiong and Lex Raas

Power catamarans offer several distinct benefits over monohulls.

GREATER STABILITY & COMFORT

The dual-hull design of catamarans minimizes rolling and pitching motions, resulting in a smoother, safer ride, especially in rough seas.

MORE SPACE

Single hull boats usually taper to a point, which means space gets narrower as you move towards the bow. On a catamaran, this space constriction does not happen. The wider beam allows for multiple cabins, spacious lounging areas, and ample storage.

BETTER MANEUVERABILITY

Twin-hull configuration and shallow draft makes power cats easier to handle in tight situations, such as docking, navigating channels and inlets, or getting close to idyllic shallow-water locations.

FUEL EFFICIENCY

Catamarans experience less water resistance and improved hydrodynamics, reducing fuel consumption. The twin hulls allow the boat to glide more easily through the water.

We obsess over the details.
So you don't have to.

SAFETY FIRST

All Aquila models are CE Certified by the International Marine Certification Institute, the only international certification for recreational boats.

GREATER STRENGTH

Aquila power cats are made using a resin-infusion process for superior strength and consistency. It eliminates most air voids which can compromise the hull's integrity.

QUALITY MATERIALS

We only use vinylester resin for our hulls. It's resistant to heat, chemicals, water, corrosion, and has a high impact strength. Most boats are built with low-quality polyester which can crack and blister easily.

MORE THAN MEETS THE EYE

For us, it's all about the details: expansive laminated glass for panoramic views, bulbous bows on all Yacht models for a smoother ride, meticulously designed hulls, easy bow-to-flybridge access, a patented davit crane for the water toys, ample storage for all the comforts of home, and more!

MEET THE FAMILY

FISHING

Some chase fish. Others chase freedom. The Aquila Molokai series delivers both—offshore-ready, stable, and versatile. Built for bold journeys.

LUXURY

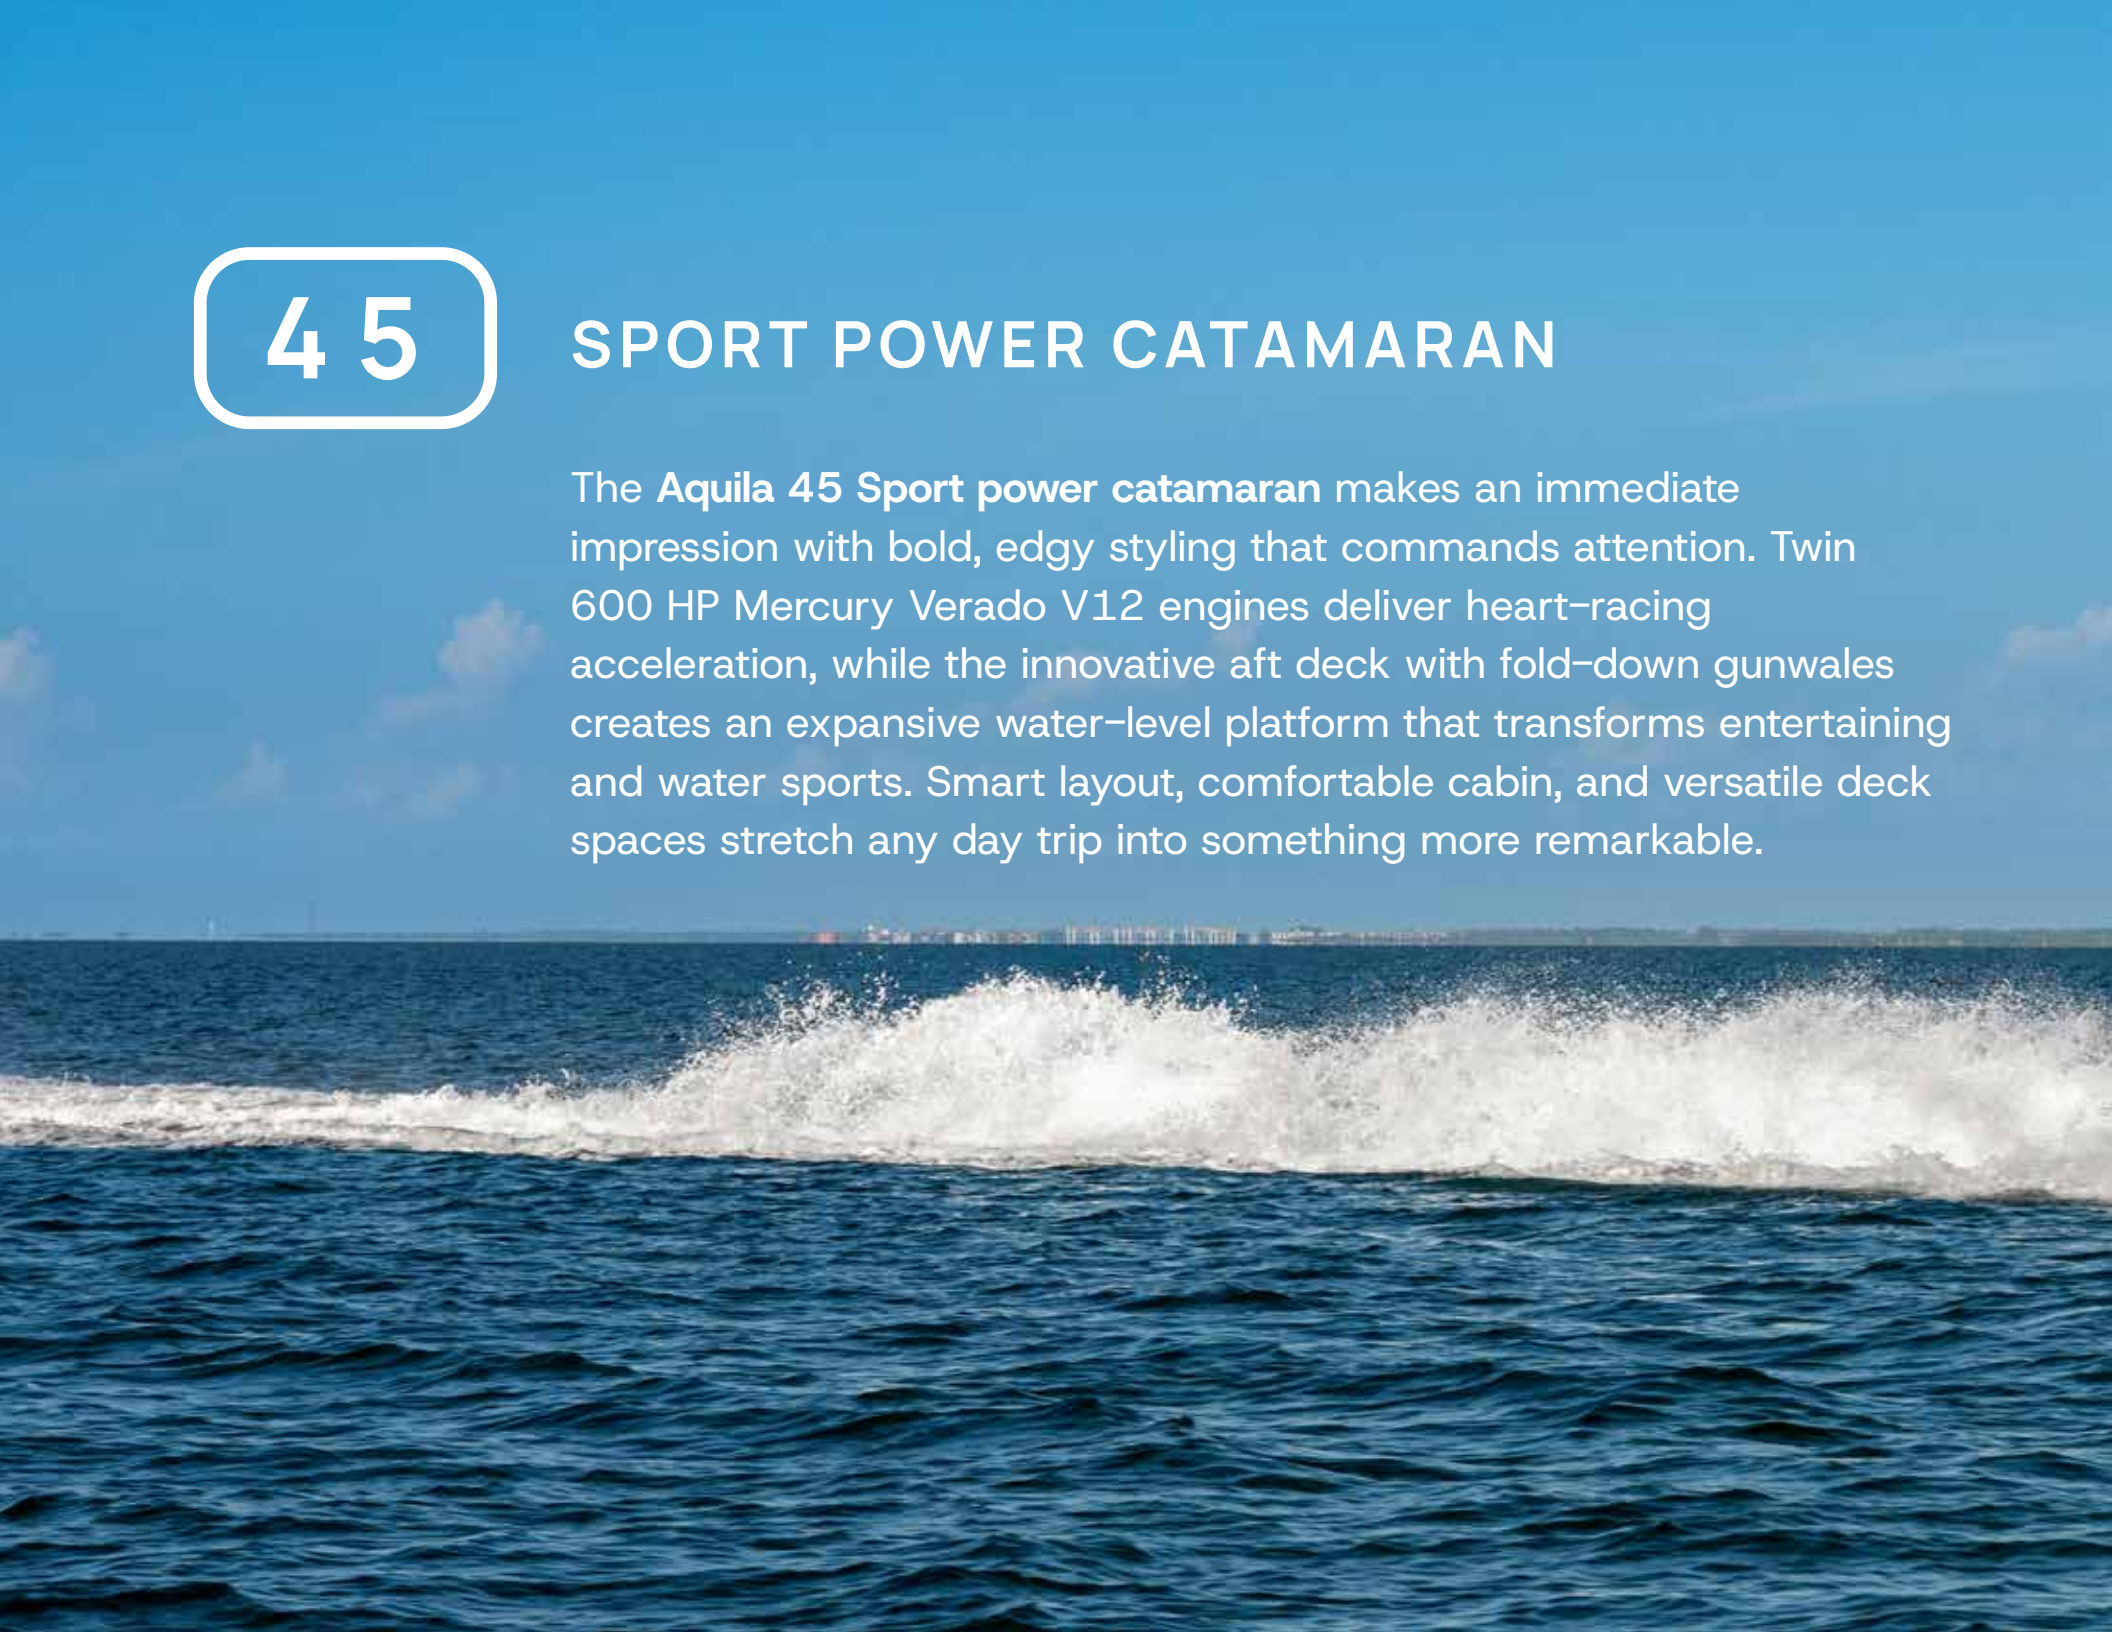

This isn't about showing off—it's slipping away in ultimate refinement; the pinnacle of intelligent luxury at sea.

70 LUXURY

SYDNEY, AUSTRALIA

The background of the entire page is a photograph of a blue sky and a body of water. In the foreground, there is a large, white, foamy wake from a boat moving across the water. In the distance, a low-lying coastline with some buildings and trees is visible under a clear blue sky.

45

SPORT POWER CATAMARAN

The **Aquila 45 Sport power catamaran** makes an immediate impression with bold, edgy styling that commands attention. Twin 600 HP Mercury Verado V12 engines deliver heart-racing acceleration, while the innovative aft deck with fold-down gunwales creates an expansive water-level platform that transforms entertaining and water sports. Smart layout, comfortable cabin, and versatile deck spaces stretch any day trip into something more remarkable.

UNLEASHED

Twin Mercury Verado V12 600 HP outboards launch the Aquila 45 Sport off the line with the kind of authority you feel in your chest. A vacuum-infused, double-stepped hull keeps her planted and predictable when you push it, while a 15-foot beam — extending to over 19 feet with optional hydraulic fold-out terraces — gives you a platform that turns heads at every sandbar.

A well-appointed wet bar with refrigerator, Corian countertops, and an optional two-burner cooktop anchors the cockpit, while U-shaped convertible seating, hi/low tables, and forward-facing bow lounges host up to 15 in comfort. The fiberglass hardtop is engineered for SUP and kayak roof racks, and the optional Makefast electric shade system rolls cover across the aft deck at the push of a button.

CHASE THE DAY

Joystick piloting makes tight marinas feel small, and a 400-gallon fuel capacity puts the next island, the next sandbar, the next anchorage all on the table. Four adjustable helm seats sit behind a wraparound windshield with freshwater wipers, while C-Zone digital switching and a Fusion Apollo Series audio package — eight 7.7" speakers, multi-zone control — turn the helm into command central.

When the sun drops, a private cabin with king-sized memory foam berth, oversized skylight, and full wet head with hot-and-cold shower turns day trips into long weekends. Aquila's patented slide-out swim ladder and optional GHS hydraulic gunwale doors drop you into the water on your terms — and the only question left is where to go next.

36

SPORT POWER CATAMARAN

The **Aquila 36 Sport power catamaran** transforms spontaneous days into unforgettable adventures with its perfect blend of exhilaration and comfort. Twin Mercury Verado V8 engines with joystick piloting deliver confident handling, while the expansive 14'7" beam creates a social platform that rivals larger yachts. With two private cabins, each with en-suite bathrooms, this versatile boat stretches day trips into overnight escapes—proving that with smart design, every boating minute can deliver more enjoyment.

FULL THROTTLE

Twin Mercury Verado outboards — V8 300 HP standard, V10 400 HP available — push the Aquila 36 Sport off the line with the kind of authority that makes the rest of the marina look slow. A resin-infused, twin-hull catamaran platform keeps her stable and predictable when you push it, while a 14'7" beam delivers a deck footprint that monohulls in her class simply can't match. Optional foil technology takes performance further still — lifting the hulls to slice fuel burn, smooth the ride, and stretch every tank of gas across more horizon.

A starboard galley with Corian surface, fridge/freezer, and wash basin anchors the main deck, while convertible forward seating turns into twin sunbeds, port-side settee with folding table hosts dockside lunches, and side boarding doors plus a stainless gate to the aft swim platform make the water just one step away.

WEEKENDS REWRITTEN

Joystick piloting and a 330-gallon fuel capacity put the next sandbar, the next anchorage, the next horizon all within reach. A two-up helm with adjustable seating, Mercury VesselView display, ActiveTrim control, and a multi-zone Fusion audio system keeps every run dialed in and sounding good.

When the sun drops, two private cabins with memory foam berths and en-suite heads — each with fresh-water electric flush toilet and pull-out shower — turn day trips into long weekends for up to four. A custom retractable swim ladder with teak steps, an integrated targa arch, and an optional fully enclosed version mean she's ready for whatever you point her at — from sunrise solo runs to the kind of weekends you'll be talking about all year.

32

SPORT POWER CATAMARAN

The **Aquila 32 Sport power catamaran** delivers big adventure in a brilliant package. With twin Mercury Verado V6 225HP engines and a stable 12'8" beam, this nimble boat provides thrilling performance for up to 22 passengers. The intelligent deck layout—including versatile seating and a cabin with private bathroom—transforms from sunning platform to social hub with ease. For spontaneous days that might stretch into evenings, the Aquila 32 Sport proves extraordinary moments start with smart design.

HIT THE GAS

Twin Mercury Verado outboards — V6 225 HP standard, V8 300 HP with joystick piloting available — get the Aquila 32 Sport up and moving with the kind of response that makes every run feel quick. A resin-infused twin-hull catamaran platform delivers the stability and fuel efficiency that monohulls in her class can't touch, while a 12'8" beam packs a deck big enough for 22 onboard into a footprint nimble enough for tight marinas and easy trailering.

A port-side summer kitchen with Corian surface, fridge/freezer, sink, and tilt-out trash bin anchors the social space, while convertible bow seating turns into a sunpad, an aft port settee folds down into a sunbed, and integrated side boarding areas plus a stainless gate to the swim platform put the water one easy step away.

DROP ANCHOR

When it's time to slow down, a private cabin to port with a memory foam V-berth and a separate wet head to starboard — fresh-water electric flush toilet, pull-out shower, opening port light — turn the 32 Sport into a true overnighter for two. Hidden coves, quiet anchorages, and tucked-away beaches all become weekend basecamps.

A two-up helm with adjustable seating, Mercury VesselView display, ActiveTrim control, and a six-speaker Fusion audio system keeps every run dialed in, while a custom retractable swim ladder with teak steps and an expansive hardtop with twin opening hatches mean she's ready for sunrise launches, mid-day rafting, and everything in between.
